Healthy skin, *for life.*

Fasha Cosmetics was built with a clear purpose — science-backed skincare that delivers real results. Not marketing claims. Results.

The dynamic bond between science and skin health is the essence of BEO. Our development team continuously reviews market trends, sources new actives, and formulates around what the evidence actually supports.

Every formulation is built for one climate in particular: intense UV, airborne dust, humidity, and the pigmentation concerns that follow from all three. That focus is why the range performs here when imported alternatives underdeliver.

THE CORE ACTIVES

Niacinamide (B3)	Oil control, breakout reduction, pore refinement, even tone
Mandelic Acid	Large-molecule AHA — gentle on sensitive and deeper skin tones
Alpha Arbutin	Dark spots and post-inflammatory pigmentation
Glutathione & Vitamin C	Antioxidant protection and radiance
